

Event Safety Management Plans

Let us bring our years of experience to benefit your event ensuring approval by Safety Advisory Groups, insurance companies and a safe well run event.

We have extensive experience in producing and delivering successful ESMP's and have a range of templates to fit every eventuality. Utilising this format will demonstrate that as an event organiser you have discharged your duties and responsibilities with due diligence, with great care towards all concerned, to the best of your ability and with regard to all relevant legislation, appropriate guidance and best practice.

Sound planning and effective management are fundamental to the success of any event. The Event Safety Management Plan underpins everything you do to ensure a safe and well run event. It sets out how the management of the event will be undertaken, explains the steps taken which lead to the key decisions arrived at and describes how the delivery of actions arising from the process will be carried out.

ESMP cover every aspect of the event and all the key factors and are an essential tool to ensuring a successful event.
